SAY BYE-BYE TO CELLULITE!

Now there's a new way to get Whitney Port's flawless gams: Reaction is a recently FDA-approved device that combines radio frequency with vacuum therapy to "decrease fat, reduce cellulite and tighten skin," says NYC plastic surgeon Dr. Matthew R. Shulman. It's so effective because it allows frequencies to be adjusted to target different layers of the skin. Doctors recommend weekly treatments for six weeks (\$2,500 per session), and results usually appear over the course of a year.
