# AGE-DEFYING PRODUCTS AND PROCEDURES

**AT-HOME** | Meet **Zeno**, the portable blemish-blaster that delivers localized heat to kill the bacteria responsible for pimples. Simply turn it on, wait for the green light and then apply to the pre-pimple for two-and-a-half minutes (don't worry, Zeno beeps when finished). For best results, use at the first sign of a cystic pimple (it won't work on whiteheads or blackheads), then once or twice more over the next 24 hours. According to New York City dermatologist David J. Goldberg, MD, "Zeno allows the patient to administer treatment that addresses the root cause of acne," without the side effects associated with topical medications. *For more about acne, see page 116. \$225; myzeno.com*
